

# **COURSE SUMMARY REPORT**

Numeric Responses

University of Washington, Seattle

Information School Term: Winter 2017

INFO 450 AE

Information Ethics And Policy Course type: Face-to-Face

Taught by: Mike Katell

Instructor Evaluated: Mike Katell-Predoc TA

Evaluation Delivery: Online Evaluation Form: X

Responses: 3/18 (17% low)

Overall Summative Rating represents the combined responses of students to the four global summative items and is presented to provide an overall index of the class's quality:

Combined Adjusted Combined Median Median 3.4 3.6 (0=lowest; 5=highest)

Challenge and Engagement Index (CEI) combines student responses to several IASystem items relating to how academically challenging students found the course to be and how engaged they were:

CEI: 4.2

(1=lowest; 7=highest)

#### **SUMMATIVE ITEMS**

	N	Excellent (5)	Very Good (4)	Good (3)	Fair (2)	Poor (1)	Very Poor (0)	Median	Adjusted Median
The course as a whole was:	3		33%	67%				3.2	3.6
The course content was:	3		33%	67%				3.2	3.5
The instructor's contribution to the course was:	3		67%	33%				3.8	4.0
The instructor's effectiveness in teaching the subject matter was:	3		33%	67%				3.2	3.5

# COURSE SUMMARY REPORT Numeric Responses

University of Washington, Seattle Information School Term: Winter 2017

# STANDARD FORMATIVE ITEMS

How frequently was each of the following a true description of this course?	N	Always (7)	(6)	(5)	About Half (4)	(3)	(2)	Never	Median	Relative Rank
The instructor gave very clear explanations.	3		100%						6.0	1
The instructor successfully rephrased explanations to clear up confusion.	3		100%						6.0	3
Class sessions were interesting and engaging.	3		67%		33%				5.8	4
Class sessions were well organized.	3		67%	33%					5.8	5
Student participation was encouraged.	3		67%	33%					5.8	9
Students were aware of what was expected of them.	3		67%		33%				5.8	7
Extra help was readily available.	3		33%		33%		33%		4.0	11
Assigned readings and other out-of-class work were valuable.	3		67%			33%			5.8	6
Grades were assigned fairly.	3		33%	67%					5.2	10
Meaningful feedback on tests and other work was provided.	3		100%						6.0	2
Evaluation of student performance was related to important course goals.	3		67%	33%					5.8	8

Relative to other college courses you have taken, how would you describe your progress in this course with regards to:	N	Great (7)	(6)	(5)	Average (4)	(3)	(2)	None (1)	Median	Relative Rank
Learning the conceptual and factual knowledge of this course.	3		33%		67%				4.2	1
Developing an appreciation for the field in which this course resides.	3		33%		67%				4.2	4
Understanding written material in this field.	3				67%	33%			3.8	7
Developing an ability to express yourself in writing or orally in this field.	3			33%	67%				4.2	2
Understanding and solving problems in this field.	3				100%				4.0	6
Applying the course material to real world issues or other disciplines.	3			33%	67%				4.2	5
General intellectual development.	3			33%	67%				4.2	3

#### STANDARD OPEN-ENDED QUESTIONS

## Was this class intellectually stimulating? Did it stretch your thinking? Why or why not?

2. Yes- discussed topics that we elaborated on in lecture

## What aspects of this class contributed most to your learning?

- 1. Mike's explanations of the material were great! It made understanding some of the concepts we were going over easier to understand.
- 2. reviewing complex material

## What aspects of this class detracted from your learning?

- 1. It was at 8:30, a time which never should be used for teaching
- 2. debate

## What suggestions do you have for improving the class?

1. Make it more fun; I know it's early, but doing more than blankly staring at the front of the room sometimes helps me learn.

*IASystem* Course Summary Reports summarize student ratings of a particular course or combination of courses. They provide a rich perspective on student views by reporting responses in three ways: as frequency distributions, average ratings, and either comparative or adjusted ratings. Remember in interpreting results that it is important to keep in mind the number of students who evaluated the course relative to the total course enrollment as shown on the upper right-hand corner of the report.

**Frequency distributions.** The percentage of students who selected each response choice is displayed for each item. Percentages are based on the number of students who answered the respective item rather than the number of students who evaluated the course because individual item response is optional.

**Median ratings.** *IASystem* reports average ratings in the form of item medians. Although means are a more familiar type of average than medians, they are less accurate in summarizing student ratings. This is because ratings distributions tend to be strongly skewed. That is, most of the ratings are at the high end of the scale and trail off to the low end.

The median indicates the point on the rating scale at which half of the students selected higher ratings, and half selected lower. Medians are computed to one decimal place by interpolation. In general, higher medians reflect more favorable ratings. To interpret median ratings, compare the value of each median to the respective response scale: Very Poor, Poor, Fair, Good, Very Good, Excellent (0-5); Never/None/Much Lower, About Half/Average, Always/Great/Much Higher (1-7); Slight, Moderate, Considerable, Extensive (1-4).

**Comparative ratings.** *IASystem* provides a normative comparison for each item by reporting the decile rank of the item median. Decile ranks compare the median rating of a particular item to ratings of the same item over the previous two academic years in all classes at the institution and within the college, school, or division. Decile ranks are shown only for items with sufficient normative data.

Decile ranks range from 0 (lowest) to 9 (highest). For all items, higher medians yield higher decile ranks. The 0 decile rank indicates an item median in the lowest 10% of all scores. A decile rank of 1 indicates a median above the bottom 10% and below the top 80%. A decile rank of 9 indicates a median in the top 10% of all scores. Because average ratings tend to be high, a rating of "good" or "average" may have a low decile rank.

**Adjusted ratings.** Research has shown that student ratings may be somewhat influenced by factors such as class size, expected grade, and reason for enrollment. To correct for this, *IASystem* reports **adjusted medians** for summative items (items #1-4 and their combined global rating) based on regression analyses of ratings over the previous two academic years in all classes at the respective institution. If large classes at the institution tend to be rated lower than small classes, for example, the adjusted medians for large classes will be slightly higher than their unadjusted medians.

When adjusted ratings are displayed for summative items, **relative rank** is displayed for the more specific (formative) items. Rankings serve as a guide in directing instructional improvement efforts. The top ranked items (1, 2, 3, etc.) represent areas that are going well from a student perspective; whereas the bottom ranked items (18, 17, 16, etc.) represent areas in which the instructor may want to make changes. Relative ranks are computed by first standardizing each item (subtracting the overall institutional average from the item rating for the particular course, then dividing by the standard deviation of the ratings across all courses) and then ranking those standardized scores.

**Challenge and Engagement Index (CEI).** Several *IASystem* items ask students how academically challenging they found the course to be. *IASystem* calculates the average of these items and reports them as a single index. *The Challenge and Engagement Index (CEI)* correlates only modestly with the global rating (median of items 1-4).

**Optional Items.** Student responses to instructor-supplied items are summarized at the end of the evaluation report. Median responses should be interpreted in light of the specific item text and response scale used (response values 1-6 on paper evaluation forms).
